Consumer Product Safety Improvement Act (CPSIA) of 2008

Colori USA is the exclusive distributor in USA of the TATIRI product; a wide range of high quality decorative gift, accessory and toys produced mainly in the Philippines and designed in Italy.

Product safety and customer satisfaction has always been a top priority for TATIRI. The factories we work with have a dynamic and continuous safety and quality inspection control program to insure that all their products and materials are in strict compliance & meet specifications. This is accomplished by following a rigid testing program, for materials received, on line production, product assembly and packing right before shipping.

In Addition, TATIRI uses several outside testing sources, such as Intertek, Bureau Veritas, SGS. The testing company will test the items for lead in the paints, heavy metals, toxicity, choking hazards, flammability, Phthalate, etc. The testing facility confirms that all items are manufactured & produced under the compliance of ASTM F963 for the United States and EN71 for Europe.

Tatiri certifies to Colori USA the compliance with the oversight standards and therefore, Colori USA, can confirm that, based on the manufacturer's feedback and certifications, our toys products for 2008/2009 meet all the requirements of the Consumer Product Safety Improvement act of 2008.

Lastly, Colori USA is a dedicated and transparent company, always available to answer any questions or concerns and will provide additional information upon request. Manufacturer certifications are available as well.

Please feel free to contact us directly.

Sincerely,

Colori USA
